

## Special Issue

# Food Allergy: Epidemiology, Pathogenesis, Diagnosis, and Treatment

### Message from the Guest Editors

At present, the prevalence of food allergies represents a major global health problem, affecting approximately 8% of children and 3% of adults, with a dramatically increasing number of hospitalizations due to food-related allergic reactions and food-induced anaphylaxis.

The interaction of genetic factors; epigenetic mechanisms; environmental changes; and innate immune. The cornerstones of the diagnosis are: clinical history, diagnostic testing, elimination diets, and oral food challenge.

The management of food allergies includes both short-term interventions for acute reactions and long-term strategies to prevent life-threatening events. The latter goal is achieved mainly through an elimination diet, patient/caregiver education, and pharmacological and non-pharmacological strategies to improve the patient's quality of life. Growing attention is also being given to potential immunomodulatory therapeutic approaches, including immunotherapy, biologics, and novel vaccines. With this global approach in mind, this Special Issue seeks proposals that focus on epidemiology, pathogenetic mechanisms, diagnostic tools, and validated and emerging therapeutic strategies.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
