Food Allergy: Epidemiology, Pathogenesis, Diagnosis, and Treatment

Message from the Guest Editors

At present, the prevalence of food allergies represents a major global health problem, affecting approximately 8% of children and 3% of adults, with a dramatically increasing number of hospitalizations due to food-related allergic reactions and food-induced anaphylaxis.

The interaction of genetic factors; epigenetic mechanisms; environmental changes; and innate immune. The cornerstones of the diagnosis are: clinical history, diagnostic testing, elimination diets, and oral food challenge.

The management of food allergies includes both short-term interventions for acute reactions and long-term strategies to prevent life-threatening events. The latter goal is achieved mainly through an elimination diet, patient/caregiver education, and pharmacological and non-pharmacological strategies to improve the patient's quality of life. Growing attention is also being given to potential immunomodulatory therapeutic approaches, including immunotherapy, biologics, and novel vaccines. With this global approach in mind, this Special Issue seeks proposals that focus on epidemiology, pathogenetic mechanisms, diagnostic tools, and validated and emerging therapeutic strategies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
