

## Special Issue

# Growth Hormone Disorders: Insights into Causation, Diagnosis, and Treatment

### Message from the Guest Editors

More than 60 years after Growth hormone (GH) was isolated from the human pituitary gland (1956), disorders related to this hormone represent major issues for the (neuro)endocrine community. Over the past years, a vast body of research and substantial progresses, have been conducted in the diagnosis procedures, the molecular profiling, the therapeutic strategies or even the dedicated follow-up of Acromegaly, a condition known to be almost exclusively due to a GH-secreting pituitary neuroendocrine tumor. Long-term exposition to GH replacement therapy is currently in the scope of many high-quality studies, conducted in the sake of patient's safety and quality-of-life.

Finally, GH disorders define a group of diseases in which a lot of expectations are pending, regarding the development of innovative technological tools that will undoubtedly optimize the management of patients, in the modern era of personalized medicine.

With this dedicated issue entitled “Growth Hormone Disorders: Insights into Causation, Diagnosis, and Treatment”, we kindly invite you to submit your work, and share your experience on this passionating topic.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
