Hip Surgery: Clinical Updates and Perspectives

Message from the Guest Editors

In the last two decades, hip surgery has undergone a deep transformation, including new concepts and surgical techniques that have to be established in terms of indication and results. The lack of international consensus on basic concepts in hip preservation surgery and some of them in the field of arthroplasty make hip surgery a dynamic concept that is constant progressing and under debate, leading surgeons to look to the future. In addition to specific surgical procedures, it is necessary to pay attention to various clinical aspects such as the prevention, diagnosis and treatment of infection, periprosthetic fractures or aspects related to advanced age, such as osteoporosis. In general, we must pay attention to improving the perioperative clinical situation of patients. Therefore, researchers in the field of hip surgery are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
