Novel Biomarkers and Therapeutic Targets for Human Cancers

Message from the Guest Editors

The discovery and development of novel biomarkers and therapeutic targets have greatly accelerated progress towards precision medicine in oncology. Multi-platforms for molecular characterization of tumors have given rise to new efforts in performing pathological, biochemical, molecular, and immunological research to study the mechanisms underlying carcinogenesis, with the final aim of finding the cancer biomarkers and molecular targets, which could be applied in clinical practice. Cancer biomarkers are of great interest for early diagnosis, prognosis, and prediction of treatment response and may aid in the development of new anti-cancer targeted therapies with proven benefits for treatment response and survival. However, plenty of research opportunity exists for discovering, developing, and validating cancer biomarkers and targets for improving the clinical outcomes of patients with malignant diseases. The present Special Issue aims to collect the most relevant research in the emerging areas of clinical molecular diagnostics, drug development, and targeting different signaling pathways involved in tumorigenesis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
