New Insights into Hypersensitivity Pneumonitis Diagnosis, Prognosis and Treatment

Message from the Guest Editor

Hypersensitivity pneumonitis is a diffuse lung disease which involves the small airways and the lungs and results from an exaggerated immune response to the inhalation of an antigen. The development and progression of the disease is variable and is the result of a complex interplay of genetic, host and environmental factors. Although many questions about trigger factors, disease mechanism, adequate diagnosis and optimal treatment need to be solved, important progress has been made towards better understanding hypersensitivity pneumonitis. This Special Issue of the *Journal of Clinical Medicine* will focus on some recent advances that have been made on new inciting antigens, diagnosis, prognosis and treatment of hypersensitivity pneumonitis.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
