Hypertensive Heart Disease: Symptoms, Causes and Treatment

Message from the Guest Editors

Arterial hypertension (AH) is the leading cause of morbidity and mortality worldwide. Its cardiac complications are frequent and highly variable, including hypertensive heart disease (HHD). It usually refers to pathophysiological changes of the left ventricle, left atrium, and coronary arteries attributed to chronically elevated blood pressure and thus increased workload. This term comprises a range of adaptive and maladaptive processes in patients with AH, such as left ventricular hypertrophy; heart failure; systolic or diastolic dysfunction; and arrhythmia. Recently, advancements were documented in cardiac imaging to differentiate HHD from other forms of cardiac hypertrophy but in the individual patient the differentiation remains challenging. Furthermore, questions and controversies about early detection, risk stratification, disease surveillance or individualized management of patients persist. We would like to invite original clinical and basic research, meta-analyses, and reviews related to diagnostics and therapeutics in the whole spectrum of HHD and related disorders.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
