Hypertensive Heart Disease: Symptoms, Causes and Treatment

Message from the Guest Editors

Arterial hypertension (AH) is the leading cause of morbidity and mortality worldwide. Its cardiac complications are frequent and highly variable, including hypertensive heart disease (HHD). It usually refers to pathophysiological changes of the left ventricle, left atrium, and coronary arteries attributed to chronically elevated blood pressure and thus increased workload. This term comprises a range of adaptive and maladaptive processes in patients with AH, such as left ventricular hypertrophy; heart failure; systolic or diastolic dysfunction; and arrhythmia. Recently, advancements were documented in cardiac imaging to differentiate HHD from other forms of cardiac hypertrophy but in the individual patient the differentiation remains challenging. Furthermore, questions and controversies about early detection, risk stratification, disease surveillance or individualized management of patients persist. We would like to invite original clinical and basic research, meta-analyses, and reviews related to diagnostics and therapeutics in the whole spectrum of HHD and related disorders.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
