

## Special Issue

# Implant Dentistry—Trends, Challenges and Innovations

### Message from the Guest Editor

Oral rehabilitation, especially the field of implant dentistry, has significantly evolved in the last few decades. The introduction/development of new tools, such as: The immediate function concept, digital planning, standard dental implants with different micro- and macro-designs, zygomatic implants, guided surgery, prosthetic CAD/CAM solutions, regenerative solutions, or standardized maintenance approaches with risk prediction, have allowed us to overcome significant challenges and dramatically improve patients' quality of life. Today, there is a growing body of evidence on the successful long-term outcomes of implant-supported rehabilitation protocols that provides validation for their predictability and safety.

Nevertheless, there is still margin for both exponential and incremental growth in modern implant dentistry research, considering the challenges and potential correlations between the implant geometry, the biomechanical behavior, the biomaterials, the bone quality, the patients' medical condition, and the surgical technique. Thus, research on all of the advances, innovations, and outcomes is of interest in this Topical Collection.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
