Novel Insight into Irritable Bowel Syndrome: Diagnosis, Treatment, and Management

Message from the Guest Editor

The etiology and pathogenesis of Irritable bowel syndrome (IBS) is unclear, but it is considered to be the result of the combined action of various factors such as abnormal gastrointestinal motility, abnormal visceral sensation, abnormal regulation of brain and intestine, inflammation and psychology. Several years have passed since *JCM* featured a Special Issue dedicated to IBS, and the time has come for a new one. Indeed, the research on IBS is dynamic and the most prominent literature databases display new information on a weekly basis. The work of the Rome Foundation committees has earned the interest of scientists and academic teachers in this topic, and therefore scholars and practitioners must be easily able to find synthetic papers to facilitate access to the progressing knowledge on IBS. There is also a need to offer editorial space to original work on this disorder with regard to gut-brain interaction. With this in mind, I invite you to submit your best work to this Special Issue. Your contributions will be very beneficial to the medical community.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
