

## Special Issue

# Clinical Complications after Kidney Transplantation

### Message from the Guest Editor

Despite enormous advances in kidney transplant techniques in recent decades, kidney transplant recipients frequently develop transplantation-associated health issues that have to be managed in clinical routine by transplant physicians every day. Clinical complications range from surgical issues over metabolic and cardiovascular disorders to infections and cancer. Moreover, we have to handle adverse effects of immunosuppressive agents as well as a re-occurrence of the underlying kidney disease. Unfortunately, complications may start early after (e.g., new onset of diabetes mellitus, infections, and rejections) or even during transplantation (such as hemorrhage), but some need to be taken care of especially at late stages (e.g., malignancy, interstitial fibrosis and tubular atrophy, and cardiovascular events). In this Special Issue we will address the whole spectrum of clinically relevant complications that occur in kidney transplant recipients. As complications directly impact on the health and the outcome of transplant recipients, this Special Issue should increase the awareness as well as the knowledge of transplant physicians and researchers to these issues.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
