

Special Issue

Diagnosis and Management of Knee Injuries

Message from the Guest Editor

The wide array of knee injuries, including ligament, meniscal, and cartilage injuries, produce varying degrees of malalignment and joint destruction. Management can also vary depending on the time of injury and status of degeneration. Although the multidisciplinary team approach is essential for patients with such injuries, orthopedic knee surgeons should be attuned to important surgical strategies for each injury and for specific degrees in degenerative status. For this Special Issue titled “Diagnosis and Management of Knee Injuries”, we would like to invite authors to submit their original papers or review articles on specific and novel approaches to the problems of knee injuries. These can include all territories such as injury mechanism, diagnosis, conservative treatment, and surgical treatment. Staying out of trouble by knowing the intermediate and long-term results of a specific procedure in these life-long conditions may help us to identify appropriate indications and techniques of any surgeries for the specific conditions of knee injuries.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
