Big Data and Precision Medicine Series I: Lung Cancer Early Diagnosis

Message from the Guest Editor

Lung cancer is the leading cause of cancer-related deaths and patients' survival is directly correlated to disease stage. Therefore, it is mandatory to adopt a screening strategy that embraces, not only the population at risk, but improve overall survival in high risk populations of asymptomatic patients. Today, the concept of tumor has been remodeled and it has been defined as a disease that has its own genetic, biological and metabolic identity and with this new awareness, new screening methods should base. The analysis of new biomarkers (i.e., volatile organic compounds, microRNA-test and urine analysis) associated with a high specificity of new screening methods, that are non-invasive, safety, inexpensive and simple to perform, could allow a non-invasive approach that can determine a big change in the early diagnosis of cancer and survival rate. Please join us in presenting this Special Issue on the state-of-the-art research currently being performed on lung cancer screening and early diagnosis to gather our effort in order to get, as soon as possible, an early and effective diagnosis of lung cancer. Dr. Gasparri Roberto

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
