

## Special Issue

# Clinical Features and Long-Term Outcomes of Systemic Lupus Erythematosus

### Message from the Guest Editors

The clinical spectrum of systemic lupus erythematosus (SLE) is highly heterogeneous. The clinical manifestations range from skin and joint involvement to life-threatening conditions such as renal or neuropsychiatric disease, severe cytopenias and thromboembolic events. Despite advances in pharmacotherapy, SLE is still characterized by premature mortality and substantially reduced health-related quality of life. The unmet needs are many. Development of effective drugs that can induce remission or low disease activity is imperative, but has been challenging due to the heterogeneity of the disease, among other reasons. Effective management of flares, identification of biomarkers of disease activity and long-term outcomes, as well as implementation of the patient perspective as an integral part of the clinical assessment constitute only few of the goals towards optimized management. This Special Issue aims to provide current and new knowledge on clinical features and outcomes of SLE, including disease phenotypes, therapeutic strategies, and biomarkers of activity, treatment response and prognosis. Research incorporating the COVID-19 pandemic and its consequences is also welcome.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
