Management of Liver Transplantation: Current Status and Future Direction

Message from the Guest Editor

The liver transplantation world is evolving rapidly. As a fixed point in our practice, liver donors' shortage is still the first limitation for enlargement criteria. Nevertheless, improvement of medical, surgical, and radiological treatments will upset the actual liver transplant indications. New indications are now understudies and will undoubtedly be part of the future practice. The surgical approach with minimally invasive technique, the further chemotherapy for metastatic diseases, and the recent increase of non-alcohol fatty liver are enlarging potential candidates for transplantation. Current practice achieves excellent results and is the aim to reach for the new ones. With this Special Issue, we hope to focus on the current state and the future direction of liver transplantation. *Please click [here](#) to find information!*

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
