Clinical Advances in Meibomian Gland Dysfunction and Dry Eye Disease

Message from the Guest Editors

Meibomian gland dysfunction (MGD) and dry eye disease (DED) are both quite common. Their ocular symptoms are similar and both reduce quality of life, although the pathogenesis differs somewhat between these diseases. Recent advances in both diagnostic methods, instruments, and treatments of MGD and DED have made tremendous strides. This Special Issue aims to provide an update regarding diagnostic and therapeutic options in the field of MGD and DED.

Therefore, we would like to invite original research and review articles. In particular, we would like to encourage the submission of manuscripts covering important items regarding the topics below. CO idea: In particular, we would like to encourage the submission of manuscripts covering these leading topics below:

- Diagnostic methods of MGD and DED;
- Symptoms of MGD and DED;
- Treatments of MGD and DED;
- Prevention of MGD and DED;
- Relationship between MGD and DED

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
