New Developments in Minimally Invasive Gynecologic Surgery

Message from the Guest Editors

Laparoscopy was created in France in 1944 when the great gynecologic surgeon, Raoul Palmer, had the idea to introduce an optical camera inside the abdomen during operations. Since then, the progress made has revolutionized our approach to women's health care in terms of prognosis and quality of life in gynecological disorders. More recently, robotic-assisted laparoscopy has enabled even more complex procedures to be performed while improving surgeons' comfort. In most conditions, whether benign or malignant, the minimally invasive approach has become the standard and is associated with reduced morbidity and improved post-operative outcomes. New developments made in minimally invasive gynecologic surgery relate to different aspects of research, including materials and techniques, enhanced recovery after surgery (ERAS) protocols, anatomical considerations, surgical procedures, pre- or postoperative management, and virtual reality. This issue aims to promote original works as well as reviews or meta analyses that could contribute to improving our standard of care and women's health. We cannot wait to read your interesting work!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
