Multiple Sclerosis: Diagnosis, Management, and Future Opportunities

Message from the Guest Editor

Multiple sclerosis is characterized by the need to find new solutions for its management both from an epidemiological point of view and for progress in the field of pharmacological, symptomatic, and rehabilitative therapies. We have been diagnosing so-called millennials with MS for some years now, and it is therefore the duty of science to explore new tools for diagnosis, management, and future approaches—which is precisely the goal of this Special Issue on “Multiple Sclerosis in 2021: Diagnosis, Management, and Future Opportunities”. We look forward to your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
