Effects of Diabetes on Neurodegenerative and Neurovascular Changes

Message from the Guest Editor

The incidence of diabetes is projected to double by 2030. Diabetes shows several associated alterations, including vascular dysfunction, neuropathies, as well as central complications. All nerve fibre types are adversely affected by diabetes and, in addition to glycemic control and duration of diabetes, conventional and non-conventional markers of macro- and micro-vascular disease are strongly associated with neurodegenerative changes. In this Special Issue, we are making a call to action to stimulate researchers and clinicians to submit their most valuable studies on neurodegenerative and neurovascular changes in diabetes. Original investigations, review articles, and research letters are especially welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
