Novel Therapeutic Approaches for Pulmonary Hypertension

Message from the Guest Editor

Over the past 25 years, tremendous progress has been made in the therapeutic possibilities for pulmonary hypertension. This statement applies to both pharmacological and surgical or percutaneous interventions. The goals and methods of therapy differ significantly depending on the etiology of pulmonary hypertension. In the present Special Issue, we want to gather a collection of original, interesting and innovative papers on new therapeutic options for pulmonary hypertension. We invite authors of papers in the field of clinical medicine in the adult and pediatric populations and basic science researchers who work on experimental studies facilitating new therapeutic options. Let this Special Issue be a forum for the exchange of fresh ideas and innovative concepts!

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
