Oral Cancer Biomarkers

Message from the Guest Editor

Oral cancer is the sixth most common cancer worldwide. It is frequently diagnosed in advanced stages, associated with poor prognosis and a high mortality rate. Despite the development of multi-modal therapeutic strategies, most cases develop recurrences at local and / or regional level and about the third part develop distant metastasis. Therefore, it is necessary to know the molecular mechanisms underlying the resistance to chemotherapy, which allow the development of new more effective therapeutic strategies in the treatment of oral cancer. It is known that molecular profiles of tumors are heterogeneous and dynamic during the course of the disease and treatment. The cellular mosaicism is related to therapy resistance and the ability to metastasize the different subpopulations of cancer cells, which is the key for development targets and personalized therapy. The aim of this Special Issue is to gather the recent advances on clinically potential biomarkers to apply a precision oncology in the field of oral cancer.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
