Breakthroughs in Oral and Maxillofacial Surgery

Message from the Guest Editors

Over the last few years, oral and maxillofacial surgery (OMFS) has seen significant improvements in the medical and dental fields. In recent years, clinicians and researchers have made several significant changes in every aspect of OMFS from diagnosis to treatment. In particular, the synergy between oral surgery, maxillofacial surgery and oral pathology plays a role of primary importance in the management of patients with oro-maxillary problems. Recently, the attention of the research has been focused on new therapeutic and diagnostic approaches in the management of diseases of the oral cavity, on innovative surgical techniques for the rehabilitation of atrophic jaws, on the use of new procedures of hard and soft tissues regeneration and on the virtual surgical planning. For this reason, the therapeutic–diagnostic approach requires an important effort by researchers and health professionals. For this Special Issue on "Breakthroughs Oral and Maxillofacial Surgery" we invite you to submit proposals in every field of research on innovation in oral and maxillofacial surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
