Clinical Updates in Oral Rehabilitation

Message from the Guest Editor

Oral rehabilitation is a burgeoning and influential subject that covers the intervention, treatment, prognosis improvement and humanistic care throughout the occurrence of an oral disease. It turns our attention to patients' function and life quality instead of concentrating on the recovery of the disease itself. In the past several decades, oral facial dysfunctions including, but not limited to, temporomandibular disorders (TMDs) and obstructive sleep apnea syndrome (OSAS) have attracted a great deal of curiosity regarding their intrinsic mechanisms and multidisciplinary treatment. Oral rehabilitation requires that clinicians have a better understanding of oral physiology and function, and that they treat oral diseases from a more systemic and comprehensive view. With the aim of presenting clinical updates in oral rehabilitation, this Special Issue searches for solution updates for clinical problems related to oral rehabilitation, in order to provide guidance and recommendations for clinical treatment. We encourage submissions focusing on new clinical methods and tools in oral rehabilitation, as well as new concepts in oral rehabilitation based on clinical evidence.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
