Special Issue

Updates in the Orthopedic Management of Foot Disorders

Message from the Guest Editors

Foot disorders continue to be a significant cause of hospitalization and one of most frequent health reasons for orthopedic surgical interventions. Minimally invasive surgery (MIS) performed with minimal skin incisions, an intraoperative image intensifier, and without internal fixation represents one of the most innovative approaches in forefoot surgery. Despite the advances in traditional and MIS, as well as the innovation and application of new technologies, foot disorders—particularly oncological and diabetic foot diseases—represent serious global health issues.

In this Special Issue, we would like to offer researchers a platform to share recent scientific findings by inviting original clinical and basic research articles, meta-analyses, and systematic and narrative reviews focusing on the global aspects of the best potential orthopedic management of foot disorders. **Keywords**

- foot pathologies
- diabetic feet
- forefoot deformities
- oncology surgery
- foot tumors
- minimally invasive surgery
- percutaneous surgery
- foot joint arthroscopy
- stress fractures

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
