Updates in the Orthopedic Management of Foot Disorders

Message from the Guest Editors

Foot disorders continue to be a significant cause of hospitalization and one of most frequent health reasons for orthopedic surgical interventions. Minimally invasive surgery (MIS) performed with minimal skin incisions, an intraoperative image intensifier, and without internal fixation represents one of the most innovative approaches in forefoot surgery. Despite the advances in traditional and MIS, as well as the innovation and application of new technologies, foot disorders—particularly oncological and diabetic foot diseases—represent serious global health issues.

In this Special Issue, we would like to offer researchers a platform to share recent scientific findings by inviting original clinical and basic research articles, meta-analyses, and systematic and narrative reviews focusing on the global aspects of the best potential orthopedic management of foot disorders. **Keywords**

- foot pathologies
- diabetic feet
- forefoot deformities
- oncology surgery
- foot tumors
- minimally invasive surgery
- percutaneous surgery
- foot joint arthroscopy
- stress fractures

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
