

## Special Issue

# Recent Advances in Otitis Media and Cholesteatoma

### Message from the Guest Editor

Otitis media describes a diverse spectrum of pathologic conditions that result in inflammation of the middle ear and mastoid cavity. While a bacterial or viral infection and/or eustachian tube dysfunction are traditional key factors in otitis media, more complicated pathophysiological conditions seem to be involved in middle ear cholesteatoma and some newly characterized otitis media. Surgery is still the only therapeutic measure in cholesteatoma, usually involving a mastoidectomy and tympanoplasty to repair the tympanic membrane and the ossicles to improve hearing. Recently, auditory implants are becoming new treatment options for hearing rehabilitation after extensive cholesteatoma surgery in patients where conventional middle ear reconstruction is ineffective or impossible. In this Special Issue, we are inviting original or review articles covering the cellular biology, bacteriology, epidemiology, genetic advances, middle ear mechanics/physiology, temporal bone pathology, imaging technologies, tympanomastoid surgery and hearing rehabilitation in the context of otitis media and cholesteatoma.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
