Effect of Lifestyle Habits on the Clinical Outcome in Trauma/Orthopedic Patients

Message from the Guest Editor

Lifestyle habits (e.g., daily diet, activity level, smoking, alcohol consumption) strongly affect bone health, often resulting in reduced bone quality and stability. In combination with an increased risk for falls, this strongly increases the fracture risk. In the case of a fracture, its treatment (fixation of the fracture, handling of the surrounding soft tissue, patients' mobilization, etc.) represents a great challenge. Despite all medical progress, these patients still frequently face delayed or impaired bone healing rich in complications. This Special Issue should collect manuscripts that investigate the effect of lifestyle habits on fracture healing, reflecting our current knowledge and describing underlying molecular mechanisms that can provide novel diagnostic tools and treatment/therapeutic options.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
