Recent Advances and Innovations in Kidney and Pancreas-Kidney Transplantation

Message from the Guest Editors

Since the first kidney transplantation in the year 1954 by Joseph Murray in Boston, kidney transplantation has developed into a procedure with brilliant results based on improvements and advances in immunosuppression, surgical transplant techniques, organ allocation, and the optimization of organ procurement.

Within the last several years, the challenge in renal transplantation has become to maintain or even improve the excellent results from the past under worsening conditions by addressing organ quality and long-term transplant success, for example, using machine perfusion, advances in the diagnostics and therapy of immunological complications (antibody-mediated rejection, anti HLA- antibodies, etc.), minimizing immunosuppression, using minimally invasive surgical techniques (e.g., robotic surgery), optimizing anti-infective regimes, and/or rethinking organ allocation and recipient selection.

In this joint Special Issue of the *Journal of Clinical Medicine* and *Transplantation*, we want to invite you to describe the recent advances, new technologies, and latest developments in the field of renal and pancreas transplantation.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
