Advances in Diagnosis and Treatment of Parkinson's Disease and Other Movement Disorders

Message from the Guest Editors

Novel therapeutic strategies for the treatment of Parkinson's disease (PD) and other movement disorders are emerging. A development of new therapies for these disorders relies on overly sensitive and specific diagnostic criteria that enable an early identification of patients with MSA and 4RT and their clear delineation from patients with PD. Beyond pharmacological and surgical treatment approaches, care networks focusing on PD and other movement disorders are evolving in many areas of the world and aim to improve patients' quality of life by integrating different medical and non-medical experts into a multidisciplinary, patient-centered, and coordinated approach to deliver evidence-based and highly individualized treatment options. This issue focusses on strategies to improve the diagnostic certainty of atypical Parkinsonism such as MSA and 4RT, and addresses new therapeutic approaches for PD and other movement disorders.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
