# Percutaneous Coronary Interventions in Acute Coronary Syndromes

## Message from the Guest Editors

Few areas within the broad field of cardiology receive as much attention as Acute Coronary Syndromes (ACS), which include unstable angina, non-ST segment elevation myocardial infarction, and ST-segment elevation myocardial infarction, given its broad range of clinical presentations, diagnostic modalities, medical and invasive treatment options, and prevention. The incidence of ACS is expected to continue to increase, as life expectancy rises across the globe and the advent of high-sensitivity troponin assays and rapid rule-out protocols allow for a swift and accurate diagnosis of myocardial infarction. The field of percutaneous coronary intervention for ACS is developing at a particularly high pace. Attention has been focused on outcomes in women and minorities, the optimal intensity and duration of antithrombotic therapy, and the timing and completeness of coronary revascularization. Therefore, we invite researchers and clinicians to submit their works, including original clinical research studies, meta-analyses, systematic reviews and narrative reviews, related to percutaneous coronary intervention in the setting of Acute Coronary Syndromes in this Special Issue.

# About the Journal

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
