Special Issue

Clinical Frontiers in Percutaneous Coronary Intervention

Message from the Guest Editor

In recent years, the field of percutaneous coronary interventions (PCI) has made significant progress, mainly attributed to the development of newer devices, drugs, and the applications of technology. Although clinical outcomes after PCI have improved dramatically, the need for continuous progress remains. As the life expectancy of the general population grows, patients will have more high-risk comorbidities and more complex coronary anatomies. Moreover, the availability of intracoronary physiology and imaging has a significant impact on the percutaneous treatment of coronary artery disease. This Special Issue of the JCM aims to present cutting-edge research dedicated to clinical frontiers in percutaneous coronary intervention. I would like to invite state-of-the-art reviews, as well as original research, in this area to be considered for inclusion in this issue. Keywords: intracoronary physiology; intracoronary imaging; medical therapy; challenging coronary anatomy; complex high-risk patients; ANOCA; INOCA

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
