

## Special Issue

# Dissecting the Relationship between Personality Disorders and Suicide

### Message from the Guest Editor

The aim of this Special Issue is to provide up-to-date information on the relationship between personality disorder (PD) and suicide. We are particularly interested in novel and disruptive approaches, such as: 1) the role of a PD in processing and tolerating the *mental pain* that leads to suicide; 2) the contribution of a PD to the *presuicidal syndrome* across the lifespan, but particularly during life-cycle transitions (adolescence, middle age, or elderly age); and 3) novel tools (e.g., big data, data mining, artificial intelligence) applied to novel sources of information (e.g., social media) to disentangle the relationship between PD and suicide in the 21st century.
