Advances and Challenges in Pharmacogenomics

Message from the Guest Editors

Pharmacogenomics has the goal of improving therapeutic outcomes, increasing the efficacy of medications, and reducing adverse events by applying knowledge of patients' genetic profiles. Reproducible associations between interindividual variability in clinical response to medications and genetic variants have been reported for several drugs; however, implementation of this knowledge to improve therapeutic outcomes is still limited. This is due to several factors, among which include the need for improved resources and training about pharmacogenetics dedicated to health care providers, the need of clear guidelines on how to apply pharmacogenetic information to tailor drug therapy, the challenges of handling pharmacogenetics information in the everyday context of a polypharmacy treatment and of better understanding the molecular mechanisms that are at the basis of the association between genetic variants and interindividual variability in drug effects.

Guest Editors

Dr. Erika Cecchin

IRCCS Centro Di Riferimento Oncologico Aviano, Experimental and Clinical Pharmacology Unit, Aviano, Italy

Dr. Gabriele Stocco

Department of Life Sciences, University of Trieste, 34127 Trieste, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
