Pituitary Tumors: Diagnosis and Treatment

Message from the Guest Editor

Pituitary tumors are one of the common diseases, affecting approximately 1 in 1000 of the general population. Endocrinologists, neurosurgeons, otolaryngologists, neurologists, ophthalmologists, and neuro-oncologists frequently deal with pituitary tumors in daily practice. Pituitary adenomas are mostly benign, and some associated with specific syndromes (e.g., acromegaly, Cushing's syndrome, hyperprolactinemia) are due to inappropriate hormonal secretion. However, thorough diagnosis and multidiscipline management of pituitary adenoma remain continuous challenges. The aim of this Special Issue is to provide current advances in the diagnosis and treatment of pituitary tumors, with particular interest in the classification of various pituitary adenomas, prospective clinical studies, and innovative therapeutic modalities. Therefore, researchers and physicians are encouraged to submit their findings in this area as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
