

Special Issue

Portal Vein Thrombosis

Message from the Guest Editors

Portal vein thrombosis (PVT) can affect patients with or without liver cirrhosis. However, the two clinical settings, respectively PVT with or without cirrhosis, are very different in both background and management considerations. In fact, while in the absence of cirrhosis PVT frequently relies on underlying pro-thrombotic factors (and consequently the need of anticoagulation is obvious), in the context of cirrhosis PVT is considered to be secondary to liver disease, and it is controversial whether PVT is a cause or a consequence of impaired liver function. Consequently, the opportunity of treating PVT in cirrhosis is an open issue. Furthermore, the option of interventional treatment for both settings is a valid one. However, which cases to treat with medical or interventional treatment is still controversial. This Special Issue of the *Journal of Clinical Medicine* has the aim of investigating open issues about the etiology, pathophysiology, diagnosis, and management of PVT, both in cirrhosis and not.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
