Special Issue

Prognostic Performance and Management of Post-Cardiac Arrest Care Patients

Message from the Guest Editor

Significant improvements have been achieved in both resuscitation for cardiac arrest and post-cardiac arrest care, but mortality remains high. One of the most pressing issues for relatives and healthcare workers is to quickly obtain reliable information on the probability of obtaining a satisfactory neurological outcome. Although assessing the likelihood of poor neurological outcome and minimizing false-positive rates seems reasonable, tools to predict early a good neurological outcome would be very helpful to tailor medical therapies to the appropriate patients. Given a broader knowledge of the outcomes, physicians could introduce more or less aggressive treatment and address specific treatment. This Special Issue welcomes clinical manuscripts on studies about a multimodal approach, stepwise approach, patient-centric outcomes (quality-of-life, cognitive, or psychosocial), and tools for predicting good neurologic outcome. We also welcome all research which aims to extend our knowledge of the management of post-cardiac arrest care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
