

Special Issue

Post-stroke Intervention

Message from the Guest Editor

Estimates of the global burden of diseases have identified stroke as the second most common cause of death worldwide. In addition, stroke is estimated to be the third most common cause of disability adjusted to years of life lost worldwide. While the incidence of stroke is decreasing in high-income countries, it appears to be increasing in low- and middle-income countries. In sum, over the past few decades, significant increases have occurred in the number of people with incident stroke, the number of stroke survivors, and the disability adjusted to loss of years of life. While there are significant geographic and socioeconomic differences, the global burden of stroke is high, affecting a great number of people across the globe. This Special Edition has been designed to review newer treatment options from the time of symptom onset and will provide the reader with a broadened understanding of treatment options and their outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
