Clinical Management of Pregnancy-Related Complications

Message from the Guest Editors

Pregnancy is an unique and special period in a woman's life. It is characterized by the presence of many alterations in the physiological and immune status. Several severe pregnancy related conditions are not frequent during reproductive ages. Often various clinical specialties act in a multidisciplinary way to confront the complications. This clinical task many times is a difficult and demanding reality, which endangers the life of pregnant women and fetus. New guidelines based on evidence based medicine are produced in order to minimize the frequency of these conditions. In the current Special Issue, we aim to review the pathogenesis and management of these pregnancy related complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
