Prevention, Diagnosis and Management of Chronic Rhinosinusitis

Message from the Guest Editor

Chronic rhinosinusitis (CRS) is a frequently-encountered disease, worldwide, distressing all age groups. Lately, we have expanded our understanding of the heterogeneous nature of CRS. An impressive body of knowledge has been accumulated on the specific roles of genetic susceptibility, different viruses, fungi and bacteria, interaction between local and systemic immunity, biofilms, mucosal and bony alterations. Understanding of the pathogenesis of the disease opens the way for new treatment developments. Treatments for this disease include medical and surgical approaches. The role of “maximal medical treatment” in CRS is still to be well-defined. In spite of the tremendous advances in the understanding of the disease process and in diagnosis and treatment algorithms, still are encountered “difficult to treat” patients and recalcitrant cases. These are the reasons why this supplement is dedicated to the diagnosis, prevention and management of CRS.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
