

Special Issue

Psoriasis and Psoriatic Arthritis: Early Diagnosis and Management

Message from the Guest Editors

We know that psoriasis is a common and chronic immune-mediated skin disorder; over the last decades, our treatments for this condition have been changed by the new biological therapy that is revolutionizing the daily management of psoriasis. Many aspects of the pathogenesis are unknown, and most patients under treatment are in remission thanks to this new class of molecules. This Special Issue aims to provide news in terms of pathogenesis and treatment options to try to share knowledge in this field. We invite you to submit original research and review articles focusing on:

- Comorbidities;
- The psychological burden of psoriasis;
- Current therapies;
- Future therapies;
- Joint and nails involvement;
- Pregnancy and breastfeeding.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
