Psychological Treatment for Older Adults and Their Caregivers

Message from the Guest Editor

Psychological Treatment for Older Adults and Their Caregivers is one of the most important factors related to gerontology. Aging presents a challenge in providing adequate mental health services to a population with rapidly increasing longevity. Although older adult patients have many of the psychological needs that other age groups have, they also have some specific needs. Older adults have unique mental healthcare needs. Nevertheless, usual training in psychotherapy makes minimal distinctions between middle adulthood and old age of the client in the treatment process. Worse still, these differences are often associated with ageism. For more information, please kindly click below link: <https://www.mdpi.com/si/64422>

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
