The New Perspective in Pulmonary Fibrosis

Message from the Guest Editor

Pulmonary fibrosis research is on the move. New knowledge suggests that antifibrotic treatment benefits not only patients with idiopathic pulmonary fibrosis (IPF) but also patients with other types of progressive fibrosis. These new findings finally provide new therapeutic options for patients with fibrotic lung diseases. However, clinicians treating these patients now face additional unsolved questions on top of the already existing unmet needs in the care of patients with fibrotic lung diseases. Which patient should be treated with antifibrotics? Which patient with immunosuppressives? If so, with which immunosuppressant? Which patient would benefit from combined treatment? How should the effectiveness of antifibrotic treatment be monitored? How can our current readouts be improved? How can the progression of fibrosis be detected? The present Special Issue aims to define the current state and unmet needs in clinical practice regarding IPF. Given this background, the Issue aims to provide some urgently needed solutions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
