

Topical Collection

Recent Advances of Examination and Treatment for Retinal and Choroidal Diseases

Message from the Collection Editor

In recent years, the management of retinal and choroidal diseases has experienced a major evolution in diagnosis and treatment. In the field of diagnosis, not only optical coherence tomography, which has made great progress in the past 20 years but also OCT angiography and color scanning laser ophthalmoscope have become popular worldwide. Thus, multimodal imaging has improved the accuracy of diagnosis and understanding of pathology. Treatment for diseases has also evolved dramatically. No one would disagree that the first and foremost one is anti-vascular endothelial cell growth factor drugs. Anti-VEGF drugs have become the mainstay of treatment for retinal diseases, including age-related macular degeneration and diabetic retinopathy, and macular edema, and have greatly increased the potential of pharmacotherapy for such diseases. This Topical Collection invites a wide range of research related to ophthalmic examination, diagnosis, and treatment. Our aim is for this issue to be of help in the management of retinal and choroidal diseases and to assist you in your future research.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
