

## Special Issue

# Clinical Management and Challenges in Diabetic Retinopathy

### Message from the Guest Editor

Diabetic retinopathy (DR) is one of the main complications of diabetes mellitus and a leading cause of visual impairment. Diabetes mellitus affects a wide range of patients, from children to elderly, and DR management requires a significant commitment for both patients and the healthcare system. The complex systemic condition of these patients and the different resources available in different centers often make the pathway of care burdensome and not standardized. Recent research advancements have underlined the multifactorial nature of DR, with different disease phenotypes and stages, requiring a progressively more personalized approach. In this Special Issue, we aim to deal with the current clinical and research challenges involving DR, in different patients' ages and with particular interest in the identification of early biomarkers of disease development and response to treatment, as well as innovations in the pathway of care, from diagnosis to treatment. We believe your participation in this Special Issue, will be of great significance for the better understanding of the disease pathophysiology and for the improvement of its management and patients' wellbeing.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
