# Treatment of Salivary Gland Diseases: Established Knowledge, Current Challenges and New Insights

### Message from the Guest Editor

In the last two decades, a change in paradigm has taken place in the field of management of salivary gland diseases. Hardly any kind of pathologic entity has remained unaffected by the philosophy of individualized medicine, the general need for a reduction in therapeutic “invasiveness”, or the need for a satisfactory postinterventional quality of life. Furthermore, the need to lessen surgical invasiveness and secure a better quality of life for patients has given rise to minimal invasive surgical modalities in benign parotid gland lesions, focusing away from the dissection of the facial nerve and concentrating on the capsular features of the tumor itself. Given that this area of clinical research is undoubtedly evolving continually, the present Topical Collection is intended to provide an overview of recent advances in the field of management of salivary gland diseases in an effort to provide new evidence on several surgical and nonsurgical aspects of this topic. Therefore, I cordially invite researchers involved in clinical research to submit their original research, reviews, and communications to this Topical Collection.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
