Side Effects of Drug Therapy in the Elderly

Message from the Guest Editor

Iatrogenia is a very common problem in clinical practice, making it a public health problem. It is said to be responsible for 30% of hospitalizations, particularly impacting the elderly. In this context, knowledge is constantly evolving. A great deal of research is being carried out to try to predict, prevent and treat iatrogenia. Such research is particularly in line with the framework of personalized and participatory medicine.

Researchers of all specialties are invited to contribute to this Special Issue concerning the side effects of drug therapy in the elderly.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.
