Update on Skin Cancers: Non-invasive Diagnostic Tools and Treatment

Message from the Guest Editor

The field of dermato-oncology is ever expanding, with substantial advances in non-invasive diagnostic tools, such as dermoscopy, ultrasonography, confocal microscopy, etc. In addition, the incidence of skin cancers, including melanoma and NMSC, is increasing, and the novel diagnostic techniques may enable skin cancers to be diagnosed at earlier stages.

Non-melanoma skin cancers (NMSC) comprise common cutaneous malignancies, including basal cell carcinoma (BCC) and cutaneous squamous cell carcinoma (cSCC), together with rare cutaneous cancers, such as Merkel cell carcinoma (MCC) and other forms of adnexal cancers. The majority of NMSCs can be successfully treated with surgery or radiotherapy; however, advanced and metastatic stages may require systemic approaches, such as immunotherapy with immune checkpoint inhibitors (ICIs).

Since immunotherapy is not effective in all patients, and can potentially lead to severe adverse effects, an important clinical question is how to properly identify those who could be suitable candidates for this therapeutic choice.

Here, we welcome reviews and original research pertaining to melanoma and NMSC diagnosis and management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
