

Special Issue

Skin Inflammation: Symptoms, Causes, Diagnosis and Treatment

Message from the Guest Editors

The better understanding of immunological processes in skin inflammation has revolutionized the therapeutic concepts of not only skin diseases themselves but also comorbid diseases of other organs. The easy approach to the skin and the visibility of its alterations render it an exceptional model to investigate and treat. New classes of targeted therapies, such as biologics or small molecules, have tremendously improved the outcomes of previously poorly treated diseases. Beyond the skin, the majority of these substances have been thereafter applied for the treatment of extra-cutaneous diseases, indicating the importance of extrapolating knowledge to inflammation of other organs. This Special Issue aims to publish new data on the symptoms, causes, diagnosis and treatment of skin inflammation, in order to better understand diseases and improve clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
