Skin Pigmentation Disorders: Clinical Management and Treatment

Message from the Guest Editor

Pigmentary disorders are a leading motive for patients to visit a dermatology office. With a wide variety of diagnoses and an increasing number of multicultural patients, dermatologists face treatment challenges on a daily basis. Knowledge of the treatment dilemmas and management options is thus of paramount importance. This Special Issue aims to address a variety of issues, including the diagnosis and management of disorders of pigmentation. We invite contributions related to the clinical management and treatment for disorders of pigmentation to help us to provide patient-centered care and evidence-based recommendations.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
