## Uterus Transplantation

### Message from the Guest Editor

Uterus transplantation (UTx) is a new assisted reproductive technology (ART) and organ graft method that provides an option for women with uterine factor infertility (UFI) to deliver a child. The first successful delivery in humans after UTx with a living donor was achieved by Brännström et al. in Sweden in September 2014. This excellent outcome has provided great hope to couples with no children due to UFI, and clinical application of UTx has spread rapidly to many countries. However, UTx is still in the experimental stage and there are many medical, technical, and ethical issues to be resolved. Therefore, successful UTx in humans requires careful accumulation of data in animal experiments and clinical trials for assessment of the efficacy and safety of the procedure, because the technology associated with UTx has not been standardized. For further development of this field, more discussion on medical, ethical, and social issues is needed in the world.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
